

MAGICLINE™ PROCESS COMPARISON

Foil Systems vs Powder Systems vs Pre-Colored Film

Feature	HTF Pro™ 2-Step Foil	ONE Foil™ 1-Step Foil	ColorPowder™ Foil-Free	ONE DTF™ Colored Film
Color Source	Foil	Foil	Powder	Film
Production Speed	Slowest	Medium	Fast	Fastest
Best For	Maximum Metallic Variety	Fast Metallic Output	Soft Fashion Prints	High Volume Production
Key Advantage	Most foil colors & highest shine	Fewer steps than 2-Step foil	No foil handling + soft feel	Fastest & simplest workflow
Primary Consideration	Most steps + foil sensitivity	Limited foil colors (expanding)	Less reflective than foil	More matte finish

All MagicLine systems share the same core print chemistry. The difference lies in how color and finish are delivered.
